

FABARM FB6 PUMP-ACTION SHOTGUN

FABARM pump-action shotguns use the same advanced design and manufacturing techniques found on their premium arms. Twin action bars, deep drilled barrels, exceptionally durable carbon-fiber finish, receiver-mounted Picatinny rails, as well as interchangeable chokes, make the FP6 one of the strongest and most tactically flexible pump-action security shotguns available.

Used by the United Nations international police and security and paramilitary forces in the Balkans, the FABARM FP6 is the preferred manually operated shotgun in Europe. Crafted exclusively by Fabbrica Bresciana Armi, FB6 shotguns come standard with Smart Gun Link II circuitry. Standard FB6 shotguns fire 10-gauge slug ammunition. Rechoking to 12-gauge is inexpensive and easily done.

Type	Conceal.	Ammo	Mode	Damage	Weight	Avail.	Cost	Street Index
Shotgun	2	5(m)	SS	10S	3.6	4/36	1210¥	2.25

* Being a pump-action shotgun, it takes one Simple Action to chamber the weapon, then another Simple Action to fire. Rechoking costs 50¥ for each install, and gauges 20, 12, and 10 are available. Like all pump-action shotguns, this shotgun is capable of loading flare rounds, gel-slugs and other non-lethal rounds, etc.

>>>>[I don't care what Piccadilly rails are on this thing, it's cheap and breakable. Only suckers would buy one of these.]<<<<<
- Nazé <13:12:56 - 7/16/53>

>>>>[Of course it's breakable, you used that last one to open a safe.]<<<<<
- Jubei <13:21:09 - 7/16/53>

>>>>[Yeah, and it should have gone right through it, it was a 10-gauge jube's.]<<<<<
- Nazé <13:28:29 - 7/16/53>

>>>>[You grabbed it by the barrel and swung it like an axe Nazé. Next time try firing it at something.]<<<<<
- Jubei <13:37:53 - 7/16/53>
