

MOSSBERG 590 PUMP-ACTION SHOTGUN

Mossberg 590 pump action 12 gauge shotguns provide modern design for the most serious and potentially prolonged defense operations. The exceptional 8-shot capacity Model 590 with fully parkerized finish is further complemented by a black synthetic stock and fore end.

The standard model 590 includes a double-action trigger mechanism, similar to that found on many of today's handguns, for an increased level of safety.

All model 590 shotguns are also available with our exclusive Marinecote finish which resists corrosion, is more durable than ordinary gunmetal finishes and contributes to smoother operation. Ghost Ring Sights provide incredibly fast target acquisition even in poor light conditions.

Type	Conceal.	Ammo	Mode	Damage	Weight	Avail.	Cost	Street Index
Shotgun	2	8(m)	SS	95	3.1	2/24	510¥	1.5

* +20¥ for Marinecote corrosion resistant finish. Being a pump-action shotgun, it takes one Simple Action to chamber the weapon, then another Simple Action to fire. Like all pump-action shotguns, this shotgun is capable of loading flare rounds, gel-slugs and other non-lethal rounds, etc.

>>>>>[Can't say anything bad about a Mossberg. When you're too close to hide behind anything, it feels real nice to have one of these around; unless you're a troll of course.]<<<<<<
